

# TURN FOOD & ORGANIC WASTE INTO RESOURCES

The Gaia Corporation developed a food waste recycling process that has been in production for over 20 years.

It takes your food scrap and produces a sterilized, easy-to-handle compostable material that can be introduced back into a soil mixture for your garden.

## REQUIRES

- NO bulking agents
- NO wood chips
- NO bio mix
- NO water
- WILL take product in it's packaging

## IDEAL APPLICATIONS:

Food Service Providers  
& Retailers, Restaurants,  
Grocery Stores,  
Abattoirs, Farms,  
Hospitals, Catering  
Halls, Arenas, & more!

## RENDERS

- A compostable product,
- Deodorizer process
- Stainless steel construction
- Power sources: hydro, gas, steam, propane
- Short cycle time
- Up to 90% waste
- Reduction in weight & volume
- Reduced carbon footprint
- Reduced labour
- Reduced transportation costs
- **GREATER RETURN ON INVESTMENT!**

# WASTE AUDITS CAN SAVE YOU MILLIONS

CALL US TODAY TO SCHEDULE YOURS!

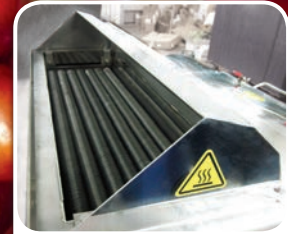

Rapidly roll out your onsite food/organic waste recycling needs, turn waste into valuable resources, and enhance corporate sustainability towards zero-waste without dependence on third-party operators.

We offer a comprehensive line of innovative food/organic waste recycling solutions which provide a highly-efficient process for accelerating the organic decomposition process based on drying, sterilizing and grinding mixed food scraps and organic waste into an easy-to-handle, compostable soil amendment.

Our systems are available with processing capacities to fit every recycling requirement — from 66 lbs to over 100 tons per day.

PATENTED "DOUBLE HELIX"  
SHREDDER & BLADE DESIGN

PROPRIETARY BLOWER  
CHAMBER TECHNOLOGY

Completes cycle typically in 8-11 hours;  
generates sterilized, easy-to-handle, dehydrated output material.

\*\*WE RECOMMEND AN ANALYSIS OF THE OUTPUT MATERIAL  
TO DETERMINE ITS BEST APPLICATION.

## Higher volume?

Enquire about our plant systems, municipalities and  
composting facilities. We have a variety of models available.
